

Student Substance Awareness Presentation Survey Report

IMAN'S LIGHT FOUNDATION OUTREACH PROGRAM

Date: June 7, 2026

Presenters: Dr. Mari Rodriguez & Mercy Preciado

Target: Students (Ages 14-18)

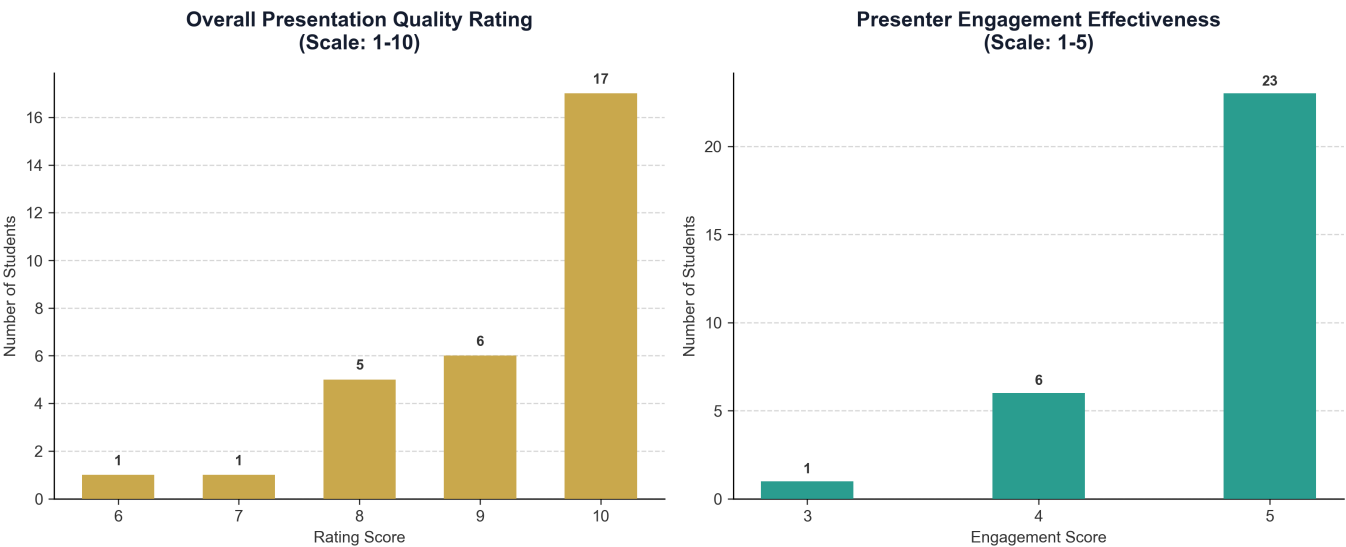

Sample Size: N=30

Location: South Florida High School Outreach

Executive Summary

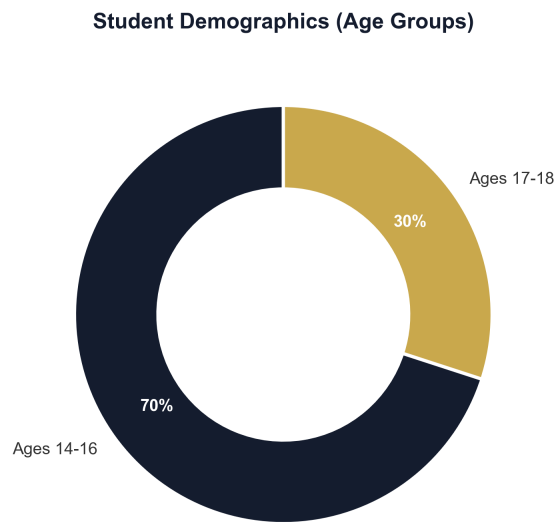

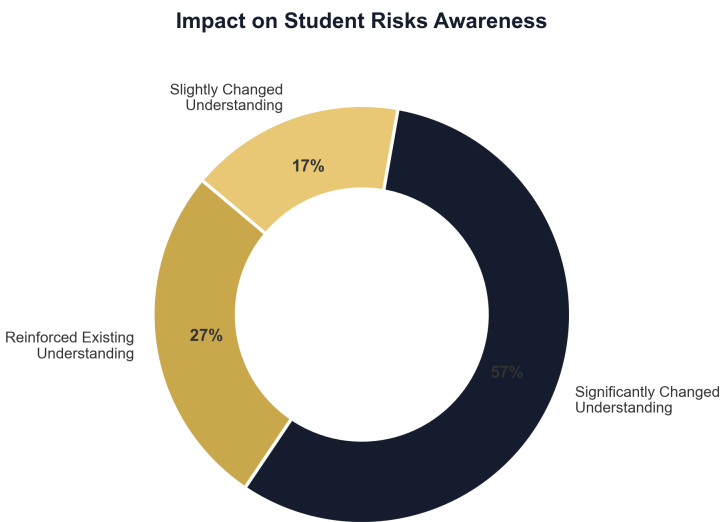

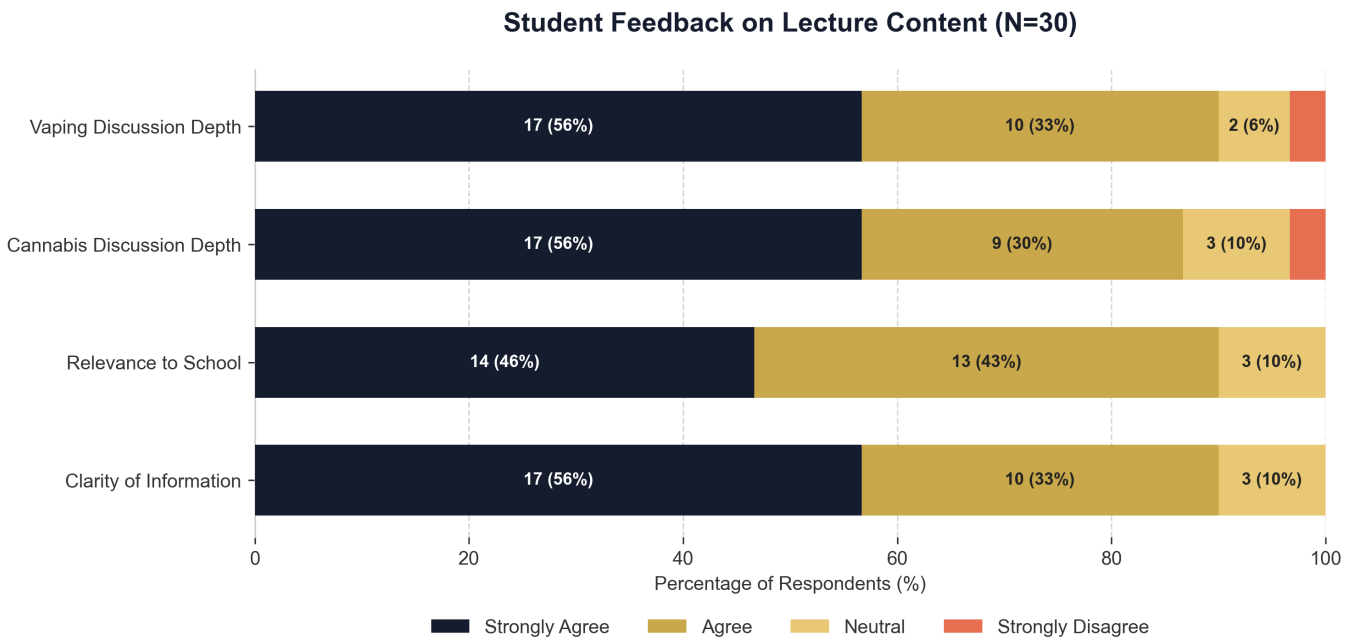

Following our core workshop on the perils of Fentanyl, counterfeit pill identification, and the risks of vaping and cannabis, we collected anonymous surveys from 30 student attendees. The feedback demonstrates exceptional reception: 80% of students rated the overall quality as a perfect 10/10 (overall mean score: 9.3/10), and 77% rated presenter engagement as a perfect 5/5. Importantly, 67% of students noted that the presentation 'Significantly changed' their understanding of substance risks, showing the life-saving educational potential of these interventions.

9.3 / 10 Avg. Quality Rating (Scale 1-10)	97% Engagement (4 or 5) (Scale 1-5)	67% Significant Mind Shift (Risks Awareness)	100% Agree/Strongly Agree (Clarity Rating)
---	---	--	--

Lecture Content Breakdown

Students evaluated four core areas of the lecture: Clarity, Relevance, Cannabis discussion, and Vaping discussion. Over 93% of respondents 'Agreed' or 'Strongly Agreed' that the information was relevant to their community. For both cannabis and vaping thoroughness, 93% expressed positive feedback, highlighting the depth of the presentations.

Qualitative Feedback & Suggestions

A vital element of our evaluations is the anonymous student suggestions. The feedback strongly indicates that teens appreciate direct, authentic communication, real-life examples, and non-judgmental assistance tools. Below are the verbatim suggestions provided by the students:

Key Themes & Direct Student Quotes:

- "keep going with your dreams"
- "limiting medication"
- "Go more into depth"
- "Go over the whole presentation in depth"
- "Don't take drugs"
- "using terms teens are more aware of"
- "Personal stories leave a bigger impact so taking time to maybe throughly be able to tell her story"
- "Keep THC away from teens"
- "use real life stories, and hearing real life experiences- mainly for people of the same group age"
- "Provide Clear Resources to end with a very simple, "no-judgment" way for people to get help or ask more questions privately, like a QR code to a website or a text line."
- "Nothing it was an amazing presentation"
- "Non for now."
- "The presentation was good, but for further presentation always include your personal experiences to show kids these things can really happen."
- "Try not to take drugs"
- "Giving them more time to finish explaining"
- "it was amazing"
- "Show more real life effects or examples of the substance abuse"

Strategic Insights for Future Presentations:

1. Share Personal & Real-Life Stories: Multiple students noted that real-life experiences leave a larger impact.
2. High School Peer Connections: Focus on peer-level scenarios for relatable messaging.
3. Private QR Resources: Build simple, low-barrier, non-judgmental ways to reach out, like QR help codes.
